

# How will I know when my import is finished? And what to do after it is in?

Last Modified on 12/04/2018 2:04 pm EST

We will send you an email once the import is complete. It will contain the next steps for you to take in your database. Please review your imported data carefully. If we have to re-do an import and you have already made updates to your imported data all changes will be lost. So please make sure you are satisfied with the imported data before you begin using the system.
