

# We use UK date format of dd/mm - is that a problem?

Last Modified on 12/04/2018 2:04 pm EST

Jackrabbit uses the US format of mm/dd. We should be able to convert the dates into US format for you. Realize that inside your database, all dates will be presented in US format of mm/dd/yyyy. If we have trouble converting your dates we will let you know.
