

Test Your Web Registration Form

Last Modified on 06/05/2019 8:44 pm EDT

[Watch a \(2:53\) video tutorial on testing your Web Registration Form](#)

After you have completed the set up of your Web Reg Settings page, Field Labels page, Agreement Text page, and verified the classes are ready, it is time to check your work! Use the "Preview Registration Form" to launch your Web Reg form. Look at what you have created. You may go back to any of the three screens and continue to edit the look and functionality of your form until it is just the way you like. Your Web Reg form is now ready to test. Again, use the "Preview Registration Form" button to launch your Web Reg form, and fill it out just as your customers will. When you are done, click "Submit", and then look in your database at the family that was created.
