

Customize Scroll Bars and Colors in Your Class Listings Tables

Last Modified on 06/05/2019 8:44 pm EDT

If you are familiar with using

rules, there are a few you can apply to your scripted tables. Two examples are shown below. Contact a webmaster for help with rules; these are only meant to show some basic possibilities. Webmasters: you may use CSS to specify styles for the table which is used for the html tags DIV, SPAN, TABLE, TR, TD, etc.

Mini Scrollable Table:

If you are pressed for room for the table, you can encase the table code within a div that forces the table into a specific size with scroll bars. This example filters to Cat1=Bunny, hides the Description and Openings columns, and places the table inside a defined-size scroll of 300x300 pixels.

Background color of table, and font style:

If you want to specify a color for the complete table background you can use a div style with the html color name or hex number. In this example, we are using color #D8BFD8.

Page	City	Day	Year	Age	Sex	Height	Weight	Build	Eye
1	London	10	1920	20	M	5'10"	150	Slender	Blue
2	London	10	1920	20	F	5'8"	120	Slender	Brown
3	London	10	1920	20	M	5'10"	150	Slender	Blue
4	London	10	1920	20	F	5'8"	120	Slender	Brown
5	London	10	1920	20	M	5'10"	150	Slender	Blue
6	London	10	1920	20	F	5'8"	120	Slender	Brown

For a complete list of special effects parameters, view the [Tricks](#) page. Any special effects not listed there are not available via Jackrabbit and would require the coding skill of a webmaster to further manipulate the table displays.
