

Print Multiple Statements / Invoices

Last Modified on 12/30/2020 4:26 pm EST

Watch the (3:11) video tutorial [Print Statements-Invoices](#)

1. Point to **Reports** (menu) > **Find a Report** > search for **Statements - Print**.
 2. Use the *Family/Account Search Criteria* to tell Jackrabbit which families you want to print a statement for.
 3. Use the *Transaction Search* section to narrow down the types and dates of transactions you want displayed on the statement.
 4. Use the *Format Options* section to create the 'look' of the statement by selecting which family and transaction information to include. Logo, header and footer settings are also customized here.
Tip: If you regularly use the same Statement Header and /or Footer, you can create defaults in *Tools > Edit Settings > Statements/eComm Receipts*. If you need to change the default for one set of statements only, you can edit the header / footer while on the *Statements - Print* screen.
 5. Click **Submit**.
 6. Statements will be created based on the settings you've chosen and open in PDF format, so that they can be printed to 8 1/2 x 11 paper.
 7. Printed statements fit into a #10 window envelope for mailing.
