Keep up with Enhancements on the Dashboard

Last Modified on 06/05/2019 8:48 pm EDT

The *Enhancements* section of the *Executive Dashboard* lists Jackrabbit's most recent enhancements by *Release Date*. Enhancements can also be viewed by going to *Tools > Recent Enhancements*.

Enhancements ⌄		
Release Date ▲	**Enhancement** ▲	**Description** ▲
06/25/20	Families Menu: Families > Search Removed	All your family data is in one place in the *Families (menu) > All Families*. There is no longer a need for *Families* (menu) > *Search*, so we have removed it from the menu to simplify the list. • Go to *Families > All Families* to sort, filter, and view all your families in one grid. Refer to Improvements to Searching Families for a quick comparison of *All Families* to Classic Search. • Migrate your *Favorites* to use with *All Families*. If you were using *Favorites* the old way, you will need to go through a one-time process to migrate your *Favorites* over to *All Families*. See Recreate Your Search Favorites in All Families for easy to follow instructions.
06/25/20	Web Registration Forms: Collapse/Expand Added to Policies & Agreements	Less scrolling during online registration for classes and events! The Required Policies and Agreements sections in both the Web Registration and Online Events Registration forms have been updated to a collapse/expand format. The user just clicks + to expand the policy to review. This takes up less space on the form and means less time scrolling through the Policy Agreements Sample View - Web Registration Form
06/18/20	Parent Portal: Added Settings for Absences & Makeups	New controls have been added to the *Parent Portal Absence & Makeup Settings* to allow you to select the following: • Limit the number of absences a parent can see in the Parent Portal. • Only allow makeups to be scheduled in classes with at least one student enrolled. • Create a scheduling window for makeup classes. You select the number of days out a parent can schedule a makeup class. Refer to Parent Portal Absence & Makeup Settings for more information.
06/18/20	Online Web Registration Form: Class Instructions Updated	Now you can enhance *Class Instructions* information in your Online Web Registration Form with the use of color fonts, rich text formatting, and styling (HTML supported). Refer to Online Web Registration Settings - General Settings for more details.
