

# How do I install the Registration Form link onto my website?

Last Modified on 01/16/2019 4:10 pm EST

The best way to add the Web Registration Form to your website is by using **Class Listings Tables** as they include the live *Register* link built into the left side of each class and can be customized and are user-friendly for your customers.

If you choose not to use the Class Listings table(s) on your website, then you can place a simple *Click Here to Register* link by using the URL code shown in the blue or gold box described in the **Link to Your Web Registration Form** article.
