

Can my customers pay online via Square?

Last Modified on 01/14/2019 2:43 pm EST

It is not possible for your customers to pay via Square.

Square (Square Market) doesn't allow payment through your website nor a 3rd party website. Square does not integrate with other systems. This information can be found on [Square's API webpage](#). If you use Square, you will need to add the payments manually into Jackrabbit.
