

How does the new registrant add Class #2 and higher when starting on the Class Listing Table(s)?

Last Modified on 01/09/2019 12:46 pm EST

The Class Listings Tables will pre-fill the selected class into the Registration Form in the Class #1 position. If the new registrant wants to enroll into additional classes at the same time, they must use the "Select Another Class" button on the Registration Form under the Class previously selected to select an additional class. It is not possible to select multiple classes directly out of the Class Listings Tables at this time. See the [Modify the Web Registration Form Class Search Page](#) page for more details. Remember that existing customers will not be using the Class Listings Tables, instead they should be logging into the Parent Portal to enroll for classes.
