

I am linking to the class listings tables but there is some strange code displaying?

Last Modified on 03/19/2019 12:53 pm EDT

If you are linking to your Class Listings Tables using the Direct Method, per the instructions in the Help article [Class Listings Tables Without Javascript](#), your code must have the word 'Direct' in it.

If you attempt to use the **JS (Javascript) Method** in a link or iframe, you'll see strange code showing.

The screenshot shows a browser window with the URL `https://app.jackrabbitclass.com/jr3.0/openings/openingsJS?orgid= XXXXX`. The page source code is visible, showing `document.write(' + " + ')` highlighted in yellow. A yellow arrow points from the URL to this code. Below the code is a table of class listings.

Register	Class	Description	Days	Times	Gender
Register	Ballet I Mon 5pm	Introductory Ballet	Mon	5:00pm-5:30pm	Both
Register	Ballet I Tues 6pm	Introductory Ballet	Tue	6:00pm-6:30pm	Both
Register	Tap I Mon 6pm	Introductory Tap	Mon	6:00pm-6:30pm	Both
Register	Hip Hop II Thurs 7pm	Intermediate Hip Hop	Thu	7:00pm-7:45pm	Both
Register	Tap II Tues 7pm	Intermediate Tap	Tue	7:00pm-8:00pm	Both

Using JS Method - extraneous code displays

The screenshot shows a browser window with the URL `https://app.jackrabbitclass.com/jr3.0/openings/openingsdirect?orgid= XXXXX`. The page source code is visible, showing an empty space highlighted in yellow. A yellow arrow points from the URL to this space. Below the space is a table of class listings.

Register	Class	Description	Days	Times	Gender
Register	Ballet I Mon 5pm	Introductory Ballet	Mon	5:00pm-5:30pm	Both
Register	Ballet I Tues 6pm	Introductory Ballet	Tue	6:00pm-6:30pm	Both
Register	Tap I Mon 6pm	Introductory Tap	Mon	6:00pm-6:30pm	Both
Register	Hip Hop II Thurs 7pm	Intermediate Hip Hop	Thu	7:00pm-7:45pm	Both
Register	Tap II Tues 7pm	Intermediate Tap	Tue	7:00pm-8:00pm	Both

With Direct Method - No extraneous code
