

# I use a CMS editor and need a 'plug-in'.... OR... I need an API.

Last Modified on 12/04/2018 2:10 pm EST

Jackrabbit does not offer plug-ins. We do offer a class listings JSON API which will provide your website programmer the raw class data in JSON format for your programmer to build your own custom UI for the class listings. (Programming is required and is not provided by Jackrabbit).
