

Can I use the same Plivo / Twilio account in two different Jackrabbit databases?

Last Modified on 02/15/2019 6:39 pm EST

Each Jackrabbit database must have its own Plivo / Twilio account with a unique Auth ID and Auth Token. Plivo and Twilio accounts cannot be shared across databases. In order to have two accounts with Plivo or Twilio, you are required to use different credit cards for payment.
