

# All of our prospective clients are currently in an Excel document. How can we mass move those to the Jackrabbit Lead File?

Last Modified on 01/14/2019 3:11 pm EST

If you have a lot of prospective customer information outside of Jackrabbit that you'd like to enter into the *Lead File*, it's possible to mass enter it into the Lead File. You'll need to import the information into Jackrabbit (see [Import Your Data into Jackrabbit](#)) first and then *Mass Archive* it into the Lead File using a *Families Imported On* date.
