My event is not listed on the Event Calendar!

Last Modified on 12/04/2018 2:11 pm EST

If an event date & time is not listed on your event calendar, check the following:

- What is the Event Status? Only Events with an Open, Notice or Unavail status will display on the Event Calendar (unless you have chosen the setting for Booked Events to also display).

- Is Display on Website set to Yes in the Event Type Summary tab? This must be set to Yes in order for the Event to display on your website's Event Calendar.

- Is Display on Internal Calendar set to Yes? This must be set to Yes in order for the Event to display on your database's internal calendar.
