

What do the different Event Status options mean?

Last Modified on 02/18/2019 8:54 am EST

There are five options for Event Status.

- **OPEN** - indicates the max size of the event has not been reached and the event day and time is still open for registration. Events with a status of *Open* will display on the Event Calendar (if Display on Website and / or Display on Internal Calendar are set to YES in the Event Type Summary tab.)
 - **UNAVAIL** - indicates the event day and time is not open for registration. Event Dates / Times with a Status=*Unavail* will display with a beige highlight on your Events calendar but will not allow registration.
 - **BOOKED** - indicates the max size of the event has been reached, the event day / time is booked, and no further enrollment is allowed.
 - **HOLD** - indicates the date is being held for some reason and registrations are not currently being accepted. Events with a status set to *Hold* do not display on the Event calendar.
 - **NOTICE** - indicates that the event is a notice only. It is viewable but can not be clicked to open a registration form. Example: Studio Holiday Closing.
