

What does 'unapplied', 'unlinked', and or 'uncategorized' mean in Jackrabbit?

Last Modified on 01/14/2019 2:53 pm EST

These terms are used to indicate when a payment and a fee are not linked with a Category 1. Jackrabbit relies on linking fees and payments to ensure accurate revenue reporting. Fees are assigned *Category 1* names; and when payments are made, the payment is applied (or linked) to a fee. The payment takes on the *Category 1* of the fee it is applied to and Jackrabbit groups it with other payments that have the same *Category 1*. When a payment is not linked, it has *No Category* and is considered *uncategorized* or *unapplied*. When a fee is not linked to a payment, we generally refer to it as *unlinked*.
