

How can I send a mass email outside of Jackrabbit?

Last Modified on 10/21/2020 5:26 pm EDT

To send a mass email from your organization's internet service provider, use **Reports > Email/Text/Marketing Reports > Email Listing** to create an email list and export it to Excel. Open your organization's email program, copy/paste the email address column in the email To field. Type the message and send.
