What is a PDF file? Why won't PDF files load on my computer?

Last Modified on 12/04/2018 2:11 pm EST

PDF (Portable Document Format) is the global standard for sharing files. To view / print PDF files, PDF reader software is required. This software typically is pre-loaded on computers but if you do not have a reader installed there are many readers that can be downloaded free (Adobe, Foxit, Google).
