

# We have multiple locations and the business address is not the correct location's address on our statement / invoice.

Last Modified on 04/24/2019 2:13 pm EDT

To ensure that the specific location address displays on the statement / invoice, add a specific location address using *Tools > Edit Settings > Locations*. Click the **View** link to bring up the *Edit Location* window. Add an address and **Save**. If a location does not have a specific address, Jackrabbit uses the main address set in *Tools > Edit Settings > Organization Defaults*.
