How do I designate which types of credit cards and bank cards we accept?

Last Modified on 07/01/2020 5:33 pm EDT

You control which credit cards you will accept for payment when a customer uses the Online Web Registration form.

1. Go to **Tools** > **ePayments Settings** > **Credit Card & Bank Account Settings**.

2. Click the **Manage Settings** button.

3. Click **Cards Accepted** on the left.

4. Select the credit cards you will accept.

5. Select **Yes** if you would like to *Allow 3 credit cards per family/account*. Set to **No** defaults to 1 credit card.

6. Click **Save Changes**.

Refer to **Manage Credit Card & Bank Account ePayment Settings** for more details.

*You must be set up with one of our ePayment partners to accept credit card payments. Refer to **ePayments - An Overview** for more information.*
