

Do I have to allow multiple cards on a family's account?

Last Modified on 01/14/2019 2:30 pm EST

Multiple cards on file is a global setting that can be turned on or off. To disable this option, Go to **Tools > ePayments Settings** and click **Manage Settings** under *Credit Card & Bank Account Settings*. Click **Cards Accepted** (left) and set *Allow 3 credit cards per family/account* to **No**. Click **Save Changes**. Log out and back in and the update will take effect.
