What about bank account numbers? Why are they masked in Jackrabbit?

Jackrabbit has taken the added security measure of masking bank account numbers. Only the last 4 digits of the bank account number are displayed on the Family *Billing Info* tab. Should you need to see the entire Bank Account number, use **Reports > Family e-Payment Listing.** (Note: A user must have permission to view unmasked bank account numbers on this report. Use **Tools > Manage Users & Permissions**. Make sure *Family e-Payment Listing:Unmask Bank Information* is checked. **Save Changes**.)
