

Student Skills/Levels - An Overview

Last Modified on 03/03/2021 2:55 pm EST

Student Skills/Levels can be used to show student progress for skills learned in class. Each main skill created can have subskills as well.

1. **Create Skill Categories in the Drop-down List Editor**
2. **Create Skills/Levels**
3. **Add Skills/Levels to Classes**
4. **Update Student Skills/Levels Individually or in Mass**

You can add skills quickly using the Jackrabbit Importer Spreadsheet found under the Tools (menu) > Import Data. Contact our Imports team directly if you need assistance with your import by emailing imports@jackrabbittech.com.
