

Custom Due Dates for Medical Requirements

Last Modified on 12/27/2018 3:40 pm EST

Custom due dates can easily be setup in Jackrabbit. A smart way is to create your Requirement with the due dates all being '0 months since birth.'

Add Immunization/Requirement

NOTE: Adding a new immunization/requirement will create student immunization / requirement records based on the student's birthday and the "# of Months Since Birth" entries below.

Category: Immunization
Name: Annual Checkup
Description: Due annually based on start date

Please enter in Months since birth when each immunization/req is due.
NOTE: The immunization/requirement due date will be calculated based on birth date.

of Months since Birth: 0
of Months since Birth: 0

Save Cancel

Then, go to the Student's **Medical** tab to enter the custom due dates. This allows you to set the due date based on something other than their birth date.

Student: Finleigh Hilton
