

Why is the Student Medical tab missing the Immunization/Medical Requirements?

Last Modified on 01/14/2019 2:15 pm EST

Requirements must first be added by going to **Tools > Edit Settings > Immunization/Req's** section.

After requirements are added, Students must have a birthdate entered on their Student page in order for the Medical tab to populate the requirements. Also, if you imported your data into Jackrabbit there is a special script which must be run after the import in order to match up the requirements with the Students. Please email Support for assistance.
