

# The clock does not display the correct date and/or time when opened. Where can I change this?

Last Modified on 01/07/2019 3:41 pm EST

If the clock does not display correct information, check your clock settings in **Tools > Edit Settings**. Be sure the Default Time Zone setting and the Daylight Savings Time settings are correct and **Save**. You may need to log out of the clock and log back in to see the change.
