

What kind of credit card swipe reader should I get?

Last Modified on 01/08/2019 5:36 pm EST

You must purchase the encrypted credit card reader from your merchant processor (SafeSave, C&H Financial, Process Pink and Studio AutoPay/Forte). This encryption makes capturing credit card information more accurate and secure.

Safe Save

We recommend model M130 with the keypad. The keypad is helpful when the magnetic strip isn't readable.

C&H Financial / Process Pink
