

Manage Credit Card & Bank Account ePayment Settings

Last Modified on 08/30/2022 1:53 pm EDT

When you are using the **ePayments Wizard** to get set up for ePayments in Jackrabbit, the second step is to work with your credit card and bank account settings.

If you have already completed the ePayments Wizard, access these settings from the **Tools** menu > **ePayment Settings** using the **Credit Card & Bank Account Settings Manage Settings** option.

ePayments Settings

Manage your ePayments settings.

CREDIT CARD & BANK ACCOUNT SETTINGS

Configure the credit card and bank account settings for Web Registration (new customers) and for Parent Portal (existing customers).

Toll-free 800-220-8611

To access your virtual terminal, click the button below:

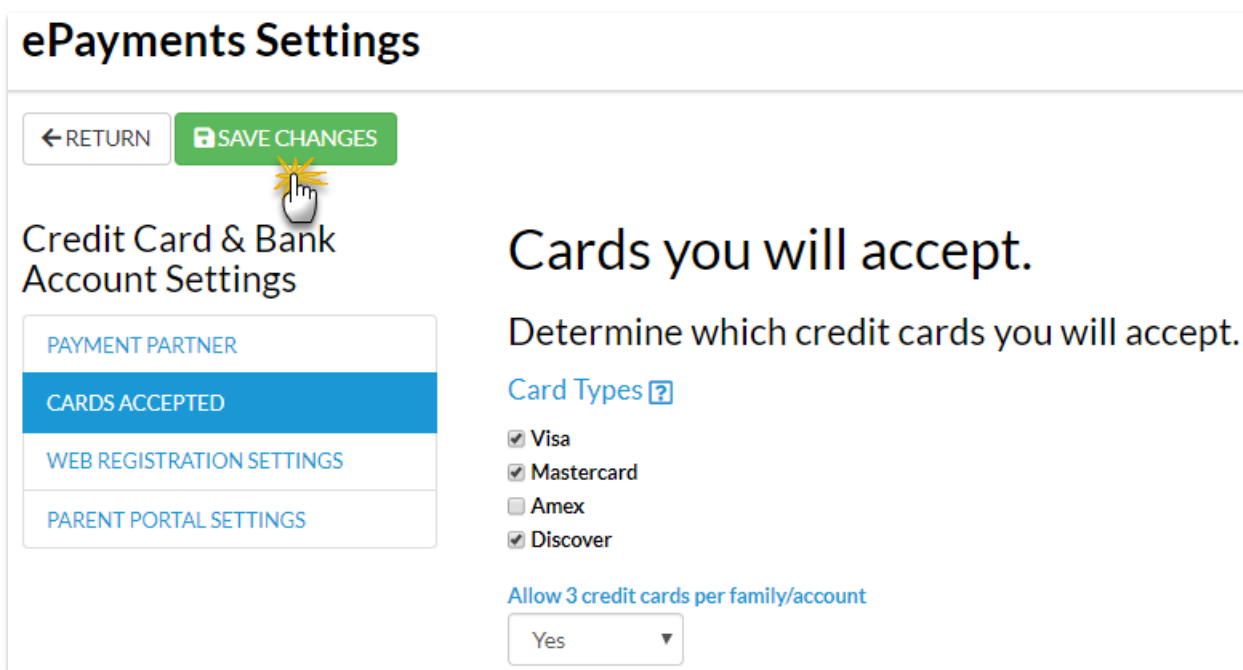

VIRTUAL TERMINAL ↗

Your org ID is 522358. You'll need this if you contact SafeSave Payments.

Cards Accepted

Card Type

These settings control what credit cards you allow to be entered in Jackrabbit and affect your Online Registration Form and the Parent Portal. An error message will be received if a family attempts to use a card that is not accepted.

Cards you will accept.

Determine which credit cards you will accept.

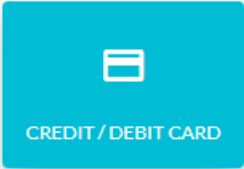

Card Types ?

- Visa
- Mastercard
- Amex
- Discover

Allow 3 credit cards per family/account

Yes ▼

The settings selected in the above image will display like this:

Online Web Registration form	In the Parent Portal
<p>PAYMENT INFORMATION</p> <p>CREDIT CARD</p> 	<div data-bbox="676 327 920 495">  <p>CREDIT / DEBIT CARD</p> </div> <div data-bbox="948 371 1099 472">  <p>BANK ACCOUNT</p> </div> <p>CARD INFO</p> <div data-bbox="668 607 975 703">  </div>

If you make any changes with your Payment Partner regarding the payment types you accept be sure to update these checkboxes.

Allow 3 credit cards per family/account

Jackrabbit offers the option to maintain up to three credit cards on file for each family. One card can be selected as the customer's Primary Card (the card that the family considers their main credit card and the card that is used in *Transactions > Process Credit Cards/Bank Accts*).

If you want to allow your families to store up to three credit cards on their account set *Allow 3 credit cards per family/account* to **Yes**. See [Multiple Cards per Family](#) for more information.

Web Registration Settings

If you will use, or already use, [Online Web Registration](#) for your new customers, decide whether your customers will be required to enter a credit card or bank account information.

Before you can collect credit card or bank account information from your customers you need to have completed your [account setup with a Payment Partner](#) and you must have received confirmation, from Jackrabbit Support, that you are ready to start processing ePayments.

Web Registration Settings

If you will use or already use online web registration for **your new customers**, decide whether your customers will be required to enter a credit card or bank account information.

At least one form of electronic payment is needed. If you are set up for bank account processing, you can give your customer the option of using a credit card or drafting from a bank account.

Credit card required?

Yes

Bank account required?

Yes

If Credit Card and Bank Account Required:

Only One Required

Only One Required

Both Required

- Set either *Credit card required?* or *Bank account required?* to **No** to hide the related fields on your **Web Registration Form**.
- If both *Credit card required?* and *Bank account required?* are set to **Yes**, choose if only one is required or if both payment methods must be entered.

Parent Portal Settings

If you will use, or already use, the Parent Portal for your existing customers, decide whether your customers will be able to update credit card or bank account information.

PARENT PORTAL SETTINGS

Parent Portal Settings (for existing customers)

If you are using or are planning to use the Parent Portal, can customers view and/or update their Credit Card or Bank Account information using the Parent Portal?

At least one form of electronic payment is needed. If you are set up for bank account processing, you can give your customer the option of using a credit card or drafting from a bank account.

Credit card information?

Can Update

Bank account information?

Hidden

Can Update

View Only

Hidden

- Select **View Only** to allow your customers to see the payment information, but not edit or delete it.

- When credit card or bank account information is **Hidden**, customers are not able to see any payment information.
- Select **Can Update*** to allow your customers to add and edit payment information in their portals.

*If you allow **multiple credit cards per family** the following is true:

- If only one card is on file, the card can be updated but cannot be deleted.
- If two cards are on file, only one can be deleted, and if the Primary Card is deleted, the remaining card becomes the Primary Card.
- If three cards are on file, only two cards can be deleted. If the Primary Card is deleted, the parent must choose a Primary Card from the remaining cards or add a new card and make it the Primary Card.

To allow your customers to make payments in their portals use your Parent Portal settings. See the *Fees & Payments Settings* of the Help article [Set Up the Parent Portal](#) for more information.

The final step in the ePayments Wizard takes you through the set up of your **ePayment email notifications** (receipts).
