

# Is the CVV code required for a Canadian Visa payment?

Last Modified on 09/03/2019 4:46 pm EDT

In order to comply with Visa Canada's mandate, the **CVV** code is required in Canada when a User (the merchant in the transaction) manually enters credit card information and processes a single, non-recurring payment (the credit card is not saved on the family's record and vaulted to the gateway).
