General frequently asked questions

What are the requirements for using Jackrabbit?

What internet browser should I use?

We want you to have the BEST Jackrabbit experience possible while being safe and secure online! Therefore, we recommend you stay up-to-date by using the latest version of the following recommended browsers:

- [Google Chrome](#)
- [Mozilla Firefox](#)
- [Microsoft Edge](#)
- [Safari](#)

To determine what browser version you are using, go to <https://www.whatismybrowser.com>.

To locate the most recent browser versions available, visit <https://www.whatismybrowser.com/guides/the-latest-version/>.

How much bandwidth (internet speed) do I need?

Bandwidth refers to the amount of data that can flow through an internet connection in a given period of time. The company that provides you with internet service is called an Internet Service Provider (ISP).

A broadband internet connection is required.

We recommend at least 5 Mbps (Megabits per second) download speed in order to have a good user experience, preferably hard wired via Ethernet. Wireless connections can be dropped and will lose speed when there is high traffic.

Check your current speed by going to www.speedtest.net.

If you do not have at least 5 Mbps download speed, contact your Internet Service Provider to increase your bandwidth.

How do I get help setting up my Jackrabbit database?

We offer a free Jumpstart Coach Program which is designed to help new users get set up for success. Click [here](#) for more information on the program and to book your first call.

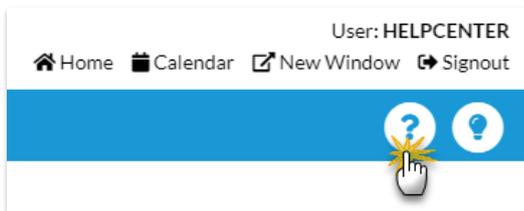

What are the differences between the logins associated with my Jackrabbit database?

As a Jackrabbit User you may need to log in to multiple places, depending on your role. Understanding what you need to accomplish will help with where to go and when!

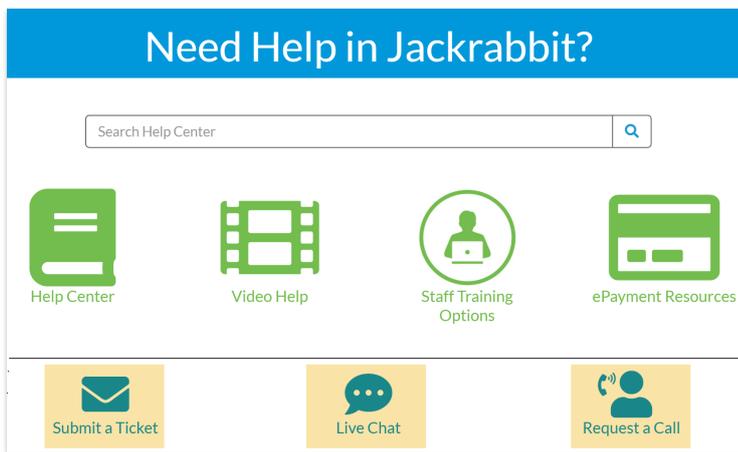

- **Jackrabbit Database User Login:** primarily used by owners, managers, and office staff for daily tasks.
- **Clock login:** used by parents or staff to check students in or out and by staff to clock in and out.
- **Billing Portal Login:** used by owner or administrator to update billing and contact information for your Jackrabbit subscription.
- **Parent Portal Login:** used by your families to enroll, make payments, agree to legalese and more.

How do I contact Jackrabbit Support?

When logged into your Jackrabbit database, click the  button on any page to access your options for contacting the Support Team.

Support Contact Options

Submit a Ticket

Support tickets allow the Support Team to log into your database, research, or re-route your issue to a specialist. Correspondence is through email.

Jackrabbit Support is open Monday through Friday 8am to 8pm ET.

Live Chat

Live Chat is for SIMPLE questions on basic topics.

Live Chat is open Monday through Friday 10 am to 6 pm ET.

Request a Call

Request a Call is for general questions, Posting Tuition fees, ePayments, Quickbooks, Database Review/Checkup Calls and other concerns you may have.

Request a Call is open Monday through Friday 10 am to 6 pm ET.

Where can all the different types of notes be seen?

Jackrabbit offers several ways to take note of important information.

Here is a key to where those notes can be seen:

Note Type	Where is note visible?	
	In Jackrabbit	Parent Portal
Family/Student/Staff Notes	<ul style="list-style-type: none"> - Family record > Notes tab - Student record > Notes tab - Staff record > Notes tab - Notes grid > Tools menu 	Not visible

Note Type	Where is note visible?	Not visible?
Class Roll Notes	- Student record > Misc tab	Not visible
Misc Family Notes	- will print on Class Roll report Family record > Misc tab	Not visible
Misc Staff Notes	Staff record > Misc tab	Not visible
Student Skills/Levels Notes	- Student record > Skills/Levels tab	Account > Students > Skills
Drop Student Notes	- Student record > Classes tab - Classes record > Drop List tab - Drop History report	Not visible
Transaction Notes	- Family record > Transactions tab - revenue and transaction reports	Billing & Payments > Transactions

Will Jackrabbit time me out after a period of inactivity?

If you are logged into Jackrabbit and are not active within a 2 hour window, you will be automatically logged out.

What is the format for entering time in Jackrabbit?

The time fields in Jackrabbit are 'masked' to force the correct format which is the 12 hr format with am and pm. Military time is not accepted. The mask will prompt you for the time of day and either an 'a' or a 'p'. *Note when entering 1 o'clock times: you must either enter a "0" before the 1 or enter the ":" after the 1.*

Why is there an globe icon next to every phone number field? What is phone validation, masked mode and international mode?

The globe icon is an indicator that the phone number field is in 'masked' mode and follows the standard US and Canada format of (###)###-####. Jackrabbit adds the () and - for the user so that phone numbers remain consistent throughout your database. When a user hovers over the phone field, the masking format (###)###-#### appears. US and Canadian organizations are automatically pre-set to masked mode, however, international phone numbers that are not in the standard masked format can be entered by clicking the globe icon to 'turn off' masked mode. When masked mode is turned off, it is called international mode.

Location:

Registration Date: Status: (auto-updated based on enrolled students) Account#:

[Family Information:](#)

Family Name: *

Contact #1 First Name: Last Name: Type:

Home Phone: Work #:

Email: (Emails are kept confidential)

Employer:

Employer Phone:

Employer Notes:

Click the Globe icon to change to International mode.

Tips for Masked Mode (globe icon appears)

- Cell phone fields allow entry of 10 digits only (no letters/symbols).
- Home, Work, Fax, and Other phone fields will allow the user to enter the 10 digits first and then 10 letters/symbols. This allows the user to enter a note about the phone number. For example, you might enter *(555)555-5555 Call first!* in the field.

Tips for International Mode (no globe icon appears)

- Cell phone fields allow entry of 10 digits only (no letters/symbols).
- Home, Work, Fax, and Other phone fields allow the user to enter 20 characters (digits, letters, symbols).

If masking is on and a phone number is entered in an incorrect format, Jackrabbit will highlight the field red and will not allow the page to be submitted or saved until the number is correctly entered.

How do I resize my company logo for use in Jackrabbit?

In order to use the organization logo on statements and other areas of your Jackrabbit database, it

must be uploaded in a jpeg, gif, or png format and be no larger than 170 pixels in height and 300 pixels in width. Use photo editing software to resize a logo (MS Paint, MS Photo Editor, PhotoShop, etc.). Once properly sized, the logo can be saved to your Jackrabbit database using the steps provided in [Organization Logo](#). *Logos saved as PNG format will not display on printed statements. If you plan to print statements, use a JPEG or GIF image.*

I have many drop downs that we don't use. Can I delete them?

We don't recommend that you delete any of your previously created drop-down values because you may need them for reporting purposes. Many of the drop-down values can be hidden, so that they won't appear in any drop down-lists in Jackrabbit.

These drop-downs can be hidden:

- [Categories 1, 2 and 3](#)
- Class Session
- [ePayment Schedule](#)
- Family Source
- Payment Method
- Transaction Subtypes
- Transaction Types

To hide a drop-down value go to **Tools > Edit Settings > Drop Down Lists** and select one of the values with the Hide option. Check **Hide from users** and **Hide from customers** next to any of the drop-downs you don't want displayed any longer. **Save Changes**. The hidden values will no longer appear in the drop-down choices for Jackrabbit users or parents when using the Web Registration Form or the Parent Portal. Uncheck a value and save changes to make it visible again.

How can I keep up with recent enhancements in Jackrabbit?

The most recent Jackrabbit enhancements are always displayed on your organization's [Executive Dashboard](#). As well you can see a listing of enhancements from the **Tools** menu > *Recent Enhancements*.

How do I get help getting Jackrabbit to work with my website?

For help integrating Jackrabbit with your website, contact our Integration Team directly at onlinereg@jackrabbittech.com.

Will Joomla work with Jackrabbit?

When determining if your website will integrate with Jackrabbit, the basic answer is always "yes". All websites support basic LINKS (hyperlinks) to other webpages.

Our Class Listings Tables module, which is optional, uses javascript to run directly on your own webpage, so if your site doesn't allow javascript then you will need to use an alternative method for that module.

Here is how Jackrabbit's 5 online modules integrate with your website:

1. **Registration Form:** a LINK to a form that NEW customers use to create their account (and enroll into classes).
2. **Parent Portal:** a LINK to a login page where the existing customers log into their account to manage their account online (and enroll into more classes).
3. **Event Calendar** (optional): a LINK that opens a calendar showing special Events (not classes).
4. **Class Listings Tables** (optional): html javascript codes that allow you to create custom table grids of your classes that can be embedded directly on your webpages (if your website allows javascript). We have alternative methods if your site doesn't allow javascript.

Will Wordpress work with Jackrabbit?

When determining if your website will integrate with Jackrabbit, the basic answer is always "yes". All websites support basic LINKS (hyperlinks) to other webpages.

Our Class Listings Tables module, which is optional, uses javascript to run directly on your own webpage, so if your site doesn't allow javascript then you will need to use an alternative method for that module.

Here is how Jackrabbit's 5 online modules integrate with your website:

1. **Registration Form:** a LINK to a form that NEW customers use to create their account (and enroll into classes).
2. **Parent Portal:** a LINK to a login page where the existing customers log into their account to manage their account online (and enroll into more classes).
3. **Event Calendar** (optional): a LINK that opens a calendar showing special Events (not classes).
4. **Class Listings Tables** (optional): html javascript codes that allow you to create custom table grids of your classes that can be embedded directly on your webpages (if your website allows javascript). We have alternative methods if your site doesn't allow javascript.

Will Wix work with Jackrabbit?

When determining if your website will integrate with Jackrabbit, the basic answer is always "yes". All websites support basic LINKS (hyperlinks) to other webpages.

Our Class Listings Tables module, which is optional, uses javascript to run directly on your own webpage, so if your site doesn't allow javascript then you will need to use an alternative method for that module.

4. **Class Listings Tables** (optional): html javascript codes that allow you to create custom table grids of your classes that can be embedded directly on your webpages (if your website allows javascript). We have alternative methods if your site doesn't allow javascript.

I want to use Jackrabbit features with my website, where can I find the HTML codes for linking?

Jackrabbit provides links or HTML codes that you (or your webmaster) place into your web editor to

integrate (display and use) features with your website.

As long as your website will allow you to LINK to another external webpage, you can use all four **Online Integration** modules. Note: The Class Listing module is designed to be scripted into your own webpage, but, if your website doesn't allow scripting, you can still use an alternate version of it.

In all of the following links, replace 'XXXXXX' with your Organization ID.

Web Registration Form

<https://app3.jackrabbitclass.com/regv2.asp?id=XXXXXX>

Parent Portal

<https://app.jackrabbitclass.com/jr3.0/ParentPortal/Login?orgID=XXXXXX>

Class Listings Tables

<https://app.jackrabbitclass.com/jr3.0/Openings/OpeningsDirect?OrgID=XXXXXX>

Events Calendar

<https://app.jackrabbitclass.com/eventcalendar.asp?orgid=XXXXXX>

Remember, each website is unique and it is your webmaster who can add "flair" to your integrations. Also, Jackrabbit has an *Integration Team* that can assist you or your webmaster with set up on any of these modules - for free! (See the **Integration Assistance** page after you have reviewed the FAQs for the particular module).

Does Jackrabbit support integration with third-party systems?

Currently, Jackrabbit offers direct integration with QuickBooks Desktop and Online versions only. Throughout Jackrabbit, however, there are many reports that can be exported into other systems such as a CRM or ERP system.
